Stage and Status Distribution

- **Total records:** 12

- **Stage 1:** 9 cases

- **Stage 2:** 1 case

- **Stage 3:** 1 case

- **Completed:** 1 case

- **Overall status:** All 12 cases are marked "On Track"

Recorded Data Limitations

- **Requirements recording:** None of the 12 cases have requirements recorded (all ‘requirementsRecorded‘ fields are false). This indicates that requirement documentation is not yet captured for any case.

- **Submission dates:** Among the 12 cases, only 4 have recorded ‘lastSubmissionDate‘ values (Student ID 123456, Student ID 2023-36646, Student ID 2023-36106, Student ID 2023-35953). The remaining 8 cases have ‘lastSubmissionDate‘ set to null, meaning no submission date was recorded for those instances.

Optional Verification Notes

- The single "Completed" status case (Student ID 2022103405) is counted in the overall total but does not affect the "On Track" aggregate.

- No additional verification steps were performed beyond what is directly observable in the snapshot.

Summary

All 12 active student records are currently classified as "On Track." However, requirements documentation is absent across all cases, and submission dates are incomplete for the majority of cases. The data reflects what is recorded rather than inferred project completion or outstanding work.
